Bite-sized education on AI and emerging technologies from MIT

CDAO

www.ai.mil

To fulfill the NDAA requirements to baseline AI education across the DoD, **the CDAO has partnered with MIT Horizon and Digital University (DU) to provide trusted content about emerging technology and innovation affecting national security.**

The MIT Horizon platform is where learners can access foundational knowledge and real-world examples from top universities and industry experts on topics ranging from Artificial Intelligence to Quantum computing. **All members of the DoD military and civilian workforce now have free access to the learning resources on Cloud One.**

The CDAO provides this capability through DU, a platform granting global access to best-in-class training content.

Self-paced bite-sized articles on emerging technologies

Access to MIT xPRO courses, live events, free e-book downloads and more

Certificates can be earned to demonstrate knowledge

Register Today at digitalu.af.mil/app/resources to access the exclusive learning resources using your .mil or .civ email

Already a DU member? Search "MIT Horizon"

* Additional content beyond MIT Horizon is also available on DU that users can access only if their organization has purchased licenses.
