About Us

We empower a more secure, interconnected world.

Our alliance stands for the safe and secure use of all technology.

We encourage everyone to do their part to prevent digital wrongdoing of any kind.

We build strong partnerships, educate and inspire all to take action to protect ourselves, our families, organizations and nations.

Only together can we realize a more secure, interconnected world.

Breaking Down the NIST Framework

- **Identifying** and understanding which business assets (“digital crown jewels”) others want
- Learning how to **protect** those assets
- **Detecting** when something has gone wrong
- **Responding** quickly to minimize impact and implement an action plan
- Learning what resources are needed to **recover** after a breach

Security Vendor Checklist

20+ Questions to ask when choosing a security vendor, including

• Does your company have a written controls plan that contains the administrative, technical and physical safeguards you use to collect, process, protect, store, transmit, dispose or otherwise handle our data (e.g., Information Security Plan)?

• Does the system or application which will be storing our company data provide access control mechanisms (e.g., unique user IDs, passwords standards, role based access)? Please elaborate.

• How will you help me comply with all applicable privacy and security laws for my business?
